Chapter	Heading	Page
One	An Introduction to Sacroiliac and Spinal Articulation	1
Two	Physiology of the Sacroiliac Joints	23
Three	Physiology of the Lumbar Joints	35
Four	Physiology of Walking	51
Five	Physiology of the Thoracic Joints	61
Six	Physiology of the Cervical Joints	75
Seven	L3 Left-Right Flexion Lesions of the Lower Back	85
Eight	L3 Right-Right Extension Lesions of the Lower Back	105
Nine	Lesions of the Thoracic Joints	127
Ten	Lesions of the Cervical Joints	139
Eleven	Diagnosing the two Models	149
Twelve	From Spinal Mechanics to Manipulation	169
Thirteen	PPT Manipulation	177
Fourteen	Physiology of the Rib cage	199
Fifteen	Physiology of the Manubrium and Clavicle	207
Sixteen	Physiology of the Acromio-clavicular Joint and Scapula	213
Seventeen	Rib Cage and Clavicle Lesions	217
Eighteen	Rib Cage Manipulation	231

Page Index

Chapter 1, 1

Research on the Sacroiliac Articulation, 2

Formulae for Sacroiliac and Spinal Articulation, 3

An Introduction into the Design of the Sacroiliac Facets - Part One, 4

An Introduction into the Design of the Sacroiliac Facet - Part Two, 5

An Introduction into the Design of the Sacroiliac Facet - Part Three, 6

The Mechanism that Drives, the Sacroiliac Joints, 7

Pelvic Side-Shift Blocking, 8

Sacroiliac Imaging Research, 9

The Sacroiliac Dividing Ridge, 10

How Translation Occurs, 11

The Purpose of the Long Sacroiliac Ligaments, 12

The Mechanics Behind the Long Sacroiliac Ligaments, 13

Theoretical Load Bearing Stresses Placed on the Innominate Bones, 14

Load Bearing Stresses Placed on the Sacroiliac Joints, 15

Pelvic and Vertebral Side-Shift, 16

Side-Shift General Observations Continued, 17

Mechanics of Spinal Articulation, 18

Terminology, 19

Basics of the The G and M Forces, 20

Experiment to Illustrate the G and M Force Interaction. Side-bending and Rotation to Opposite Sides, 21

Experiment to Illustrate the G and M Force Interaction. Side-bending and Rotation to the Same Sides, 22

Chapter 2, 23

Bayliss Sacroiliac Theory, 24

Iliac Facet Shape, 25

Anatomy of the Sacral Facets, 26

Sacroiliac Facet Engagement, 27

Innominate Movements, 28

Sacroiliac Principal of Reciprocation, 29

Pelvic Alignment and Motion, 30

Rotation Right in Lumbar Extension, 31

Rotation Right in Lumbar Flexion, 32

Rotation Right in Lumbar Flexion Pelvic Mechanics, 33

Rotation Right in Lumbar Extension Pelvic Mechanics, 34

Chapter 3, 35

Lumbar L4 Facet Anatomy, 36

L3 Facet Anatomy Inferior Facets, 37

The Importance of the Nucleus Pulposus, 38

Why L3 Rotates Right in Flexion and Side-Bends Right in Extension, 39

Rotation Right in Flexion, 40

L3 Rotation Right in Extension, 41

In Lumbar Flexion the Thoracic Vertebrae Cannot Rotate or Side-bend, 42

In Lumbar Extension the Thoracic Vertebrae are Able to Rotate, 43

L2-L1 Facet Surface Anatomy, 44

L1 The Plateau Base, 45

L1 Rotation Right in Lumbar Flexion, 46

L1 Rotation Right in Lumbar Extension, 47

L1-T12 Anatomy, 48

L1-T12 Physiology, 49

T12 when Side-Shift is to the Right, 50

Chapter 4, 51

Walking Stage One, Weight Bearing, 52

Walking, Stage One to Stage Two, 53

Walking Stage Two, Side-Shift and Ground Resistance, 54

Walking Stage Three Reciprocal Facet Action, 55

Walking Reciprocal Facet Action, 56

Walking Reciprocal Facet Action, 57

Walking, Backwards, 58

Walking Backwards Left Side Facet Action, 59

Walking Backwards Right side, 60

Chapter 5, 61

Thoracic Reference, 62

Thoracic T7 Facet Anatomy, 63

Thoracic T6 Facet Anatomy, 64

Thoracic Flexion and Extension, 65

Thoracic Rotation and Side-bending Problems, 66

Thoracic Nucleus Pulposus Placing, 67

Thoracic Rotation Right, Flexion, 68

Thoracic Rotation Right: Stepping Action, 69

Rotation Right, Side-Bending Left
in Thoracic Flexion, 70

Blocked, Rotation in Thoracic Extension, 71

Thoracic Anatomy, T1 and T2, 72

Thoracic Physiology, T1 and T2, 73

Thoracic Physiology: Rotation and Side-Shift, 74

Chapter 6, 75

Cervical Reference, 76

Cervical Flexion and Extension, 77

Cervical Rotation Flexion and Extension, 78

Cervical C2-1 Facet Anatomy, 79

Cervical Odontoid Peg, 80

Cervical, Extension Rotation Right at C1, 81

Cervical, C1 Facet Anatomy, 82

Occiput, Facet Anatomy, 83

C1-Occipital Articulation, 84

Chapter 7, 85

The Principles of a Lumbar L3-L-R Flexion Lesion Part 1, 86

The Principles of a Lumbar L3-L-R Flexion Lesion Part 2, 87

L4-L3 L3-L-R Flexion lesion to the Right, 88

Line of Gravity Changes due to
Lumbar Flexion Right Subluxations, 89

Typical L1-2, L3-L-R Recap of Flexion to the Right, 90

L2-L1.L3-L-R Flexion Subluxation to the Right, 91

L1-T12, L3-L-R Flexion Subluxation to the Right, 92

L1-T12, L3-L-R Flexion Subluxation to the Right, 93

Sacroiliac, L3-L-R Flexion Subluxation to the Right, 94

Sacroiliac, L3-L-R Flexion Subluxation, 95

Sacroiliac, L3-L-R Flexion Subluxation, 96

Sacroiliac, L3-L-R Flexion Subluxation, 97

Consequences of a Left Flexion Subluxation
on the Right Sacroiliac, 98

Illustrations, Right Iliac Flexion Subluxation, 99

Lumbar Flexion Subluxation Pattern, 100

Left-Right Pelvic Flexion Lesion , Part One, 101

Left-Right Pelvic Flexion Lesion, Part Two, 102

Left-Right Pelvic Flexion Lesion, Part Three, 103

L3-Left-Right Lumbar-Pelvic Flexion Lesion Pattern, 104

Chapter 8, 105

The Principles of a Lumbar Extension Lesion Part One, 106

The Principles of a Lumbar Extension Lesion Part Two, 107

L4-L4, Extension Lesion to the Right, 108

L4-L3 Subluxation Vs Normal Rotation, 109
L2-L1

L2-L1, Extension Subluxation to the Right, 110

L2-L1, Extension Subluxation to the Right, 111

L1-T12, Extension Subluxation to the Right, 112

Sacroiliac, Extension Subluxation to the Right, 113

Sacroiliac, Extension Sub-lesion to the Right, 114

Sacroiliac, Extension Subluxation to the Right, 115

Extension Subluxation Pattern from Right to Left Ilium, 116

Points of Facet Impact Left Ilium, 117

Extension pelvic Lesion in Block Form, 118

Changes after Side-Shift Left, 119

Left Leg Drag, 120

Theoretical Lumbar Extension Subluxations, 121

Right-Right Pelvic Extension Lesion Part One, 122

Right-Right Pelvic Extension Lesion Part Two, 123

Right-Right Pelvic Extension Lesion Part Three, 124

Theoretical Lumbar Pelvic L3-R-R Lesion, 125

Comparison Lesion Patterns in Pelvic and Lumbar L3-R-R and L3-L-R, 126

Chapter 9, 127
Theory Points of Stress Rotation Right in Thoracic Flexion, 128

T6 Flexion Subluxation to the Right, 129

T3 Extension 'Complicated' Lesion to the Left, 130

L3-Right-Right Thoracic Spine in 3D and Scapulae Displacement, 131

L3-Right-Right Thoracic Theory Outcome, 132

Thoracic Posture L3-Right-Right Subluxation Pattern, 133

Theory Rotation Right in Thoracic Extension, 134

T6 Extension 'Complicated' Lesion to the Left, 135

T3 Flexion Lesion to the Right, 136

L3-Left-Right Thoracic in 3D and Scapula Displacement, 137

L3-Left-Right Thoracic Theory Outcome, 138

Chapter 10, 139

How the Cervical Joints Lock and Cause Extension and Flexion lesions, 140

Cervical Theory, L3-Right-Right Evolving Torsions, 141

Cervical, L3-Right-Right Extension Subluxation, 142

Cervical Theory, L3-Right-Right Torsions, 143

Cervical Theory, L3-Right-Right Outcome, 144

Theory, Cervical Flexion L3-Left-Right, 145

Cervical in L3-Left-Right Flexion Subluxation, 146

Theory, L3-Left-Right Evolving Torsions, 147

Cervical Theory, L3-Left-Right Outcome, 148

Chapter 11, 149

Right-Right General Posture, 150

Left-Right General Posture, 151

Right-Right and Left-Right, Side-Views, 152

Leg Position of Right-Right and left-Right, 153

Right-Right, Knees, Neck and Head, 154

Right-Right Assessment Clinical Assessment, 155

Right-Right and L3-Left-Right Photograph Comparisons, 156

Left-Right, Plumb Line, 157

Right-Right Lesion Pattern, 158

Left-Right Lesion Pattern 159

Palpation For Differentiation Forces and Landmarks of a Lesioned R-R pelvis, 160

Palpation For Differentiation Forces and Landmarks of a Lesioned L-R pelvis, 161

Preparing for Palpation the need for a Constant, 162

Palpation of hips to Assess Pelvic Lesion, 163

Neck rotation is influenced by Pelvic Side-Shift, 164

Pelvic Palpation Indicators Level of Hips and Rotation of L5, 165

Pelvic Palpation Indicators Leg Length and Sacral Base Side-Shift, 166

Pelvic Palpation Indicators Pelvic Side-Shift and Side-bending, 167

Spinal Palpation Indicators Side-Bending at L1- Rotation of Thoracic, 168

Chapter 12, 169

Recap on Subluxated Facets, 170

Why Manipulation? 171

Discussion about Manipulation, 172

How the Sacroiliac Subluxation becomes Locked, 173

Class 1, 2 and 3 Lesions, 174

The Mechanics of a Thoracic Flexion Lesion, 175

The Mechanics of a Thoracic Extension Lesion, 176

Chapter 13, 177

The Principle Behind PPT Manipulation, 178

Notes on the Order of Correction and What is Meant by a Pass, 179

Correcting an Iliosacral Lesion on the Left Side, 180

Correcting a Sacroiliac Lesion on the Left Side, 181

Correcting a Sacroiliac Lesion on the Right Side, 182

Correcting the Pelvic Balance in the Right-Right Lesion Pattern Part One, 183

Correcting the Pelvic Balance in the Right-Right Lesion Pattern Part Two, 184

Correcting the Pelvic Balance in the Left-Right Lesion Pattern Part One, 185

Correcting the Pelvic Balance in the Left-Right Lesion Pattern Part Two, 186

Correcting a Lumbar Rotation Lesion with PPT manipulation, 187

Correcting a Lumbar Side-Bending Lesion, 188

Correcting a Side-Bending Lesion in Thoracic Flexion, 189

Correcting a Side-Bending Lesion in Thoracic Extension, 190

Correcting a Rotation Lesion in Thoracic Extension and Flexion, 191

Correcting a Cervical Lesion Safety First, 192

Correcting Cervical Lesion using the PPT Method, 193

Correcting a Classical Cervical Lesion Applying the PPT Principle, 194

Working with Pelvic Side-Shift, 195

Miscellaneous Supine Techniques, 196

Manipulation Strategy, 197

Knee Differentiation and Correction, 198

Chapter 14, 199

The Rib Cage Breathing, 200

Articular Surface of a Typical T7 Rib, 201

Articular Surface of a T1 Rib, 202

Rib Attachments to Body and Transverse Process, 203

The Rib Articulation During Breathing, 204

Rib Facet Surface Adaptation to Rotation, 205

Rib Adaptations in Flexion Rotation, 206

Chapter 15, 207

The Manubrium, 208

The Clavicle, 209

The Sterno-Clavicular Joint Side-Bending and Rotation, 210

The Clavicle Side-Bending and Rotation, 211

Manubrium facet in Summary, 212

Chapter 16, 213

Overview of the Acromio-Clavicular Ligament, 214

Acromio-clavicular Joint Movements, 215

Arm Rotation and the Scapula, 216

Chapter 17, 217

Rib Displacements in Flexion and Extension, 218

Rib Displacements in Flexion and Extension, 219

Rib Cage Distortions in the
L3-Right-Right Lesion Pattern, 220

Rib Cage Distortions in the
L3-Right-Right Lesion Pattern, 221

Rib Cage Distortions in the
L3-Left-Right Lesion Pattern, 222

Rib Cage Distortions in the
L3-Left-Right Lesion Pattern, 223

Direct Trauma to Ribs, 224

Clavicle Misalignments, 225

Clavicle Rotated Superiorly
and Laterally, 226

Clavicle Rotated Inferiorly
and Medially, 227

Displacement of the Acromion
in L3-Right-Right Pattern, 228

Displacement of the Acromion
in L3-Left-Right Pattern, 229

Aids to Rib Diagnosis, 230

Chapter 18, 31

Manipulation Rib Expiration Technique, 232

Rib Manipulation Inspiration Technique, 233

Rib Trauma Manipulation Technique in Inspiration, 234

Rib Trauma Manipulation Technique in Expiration, 235

Rib Manipulation Elevated First Rib, 236

Inferiorly Rotated Clavicle Acromio-Clavicular
Manipulation, 237

Superiorly Rotated Clavicle
Acromio-Clavicular Manipulation, 238

Sterno-Clavicular-Rib Cage Manipulation, 239

Skeleton L3-Right-Right Subluxation Pattern, 240

Skeleton L3-Left-Right Subluxation Pattern, 241

Where do we go from here?, 242

References, 243

Warning:

Be very, very careful if you try out the movements that cause bony subluxations, they can lock your back in an instant. (I found that out the hard way). The responsibility is yours.
